

Localized versions of software and technology systems are often more complex to manage and maintain than centralized versions. As a result, organizations often spend significant resources on maintaining and upgrading these systems.

McKinsey

By 2025, 60% of the new custom business applications will be built using reusable business services via a shared curated component catalog or marketplace.

Gartner®, Predicts 2023: Composable Applications Accelerate Business Innovation

Power persistent personalization with Mendix Solutions Kit

Mendix Solutions Kit empowers organizations to deliver and control cloud-native solution instances adapted to unique needs, whether regulations or processes.

Protect the common core of your solution to prevent modifications to main functionality

Adapt and extend the solution for unique requirements of each instance

Upgrade instances frictionlessly, even after customization

Provide more predictable and successful solution upgrades

Visualize impacts of an upgrade and select whether to maintain current state or accept the improved solution version

Gain unprecedented insights with feedback loops to each instance, providing visibility into how solutions are adapted & extended

Build once, deploy anywhere, customize as needed, maintain with ease

mendix

**Did your organization
build a solution with the
potential to disrupt
your industry?**

Monetize your software builds, create a new revenue stream, and enable differentiated experiences with the Mendix ISV Program.

Extend an existing solution with Mendix

Build a full solution on Mendix

Embed Mendix into your solution

Mendix ISV Program provides guided enablement, technical support, marketing assistance, flexible contracts, and access to the Mendix, Siemens, and strategic partner ecosystems.
